Author Index Volume 152

Aibara, R., Welsh, J.T., Puria, S. and Goode, R.L.
Human middle-ear sound transfer function and cochlear input impedance (152) 100
Aran, J.-M., see Wuyts, F.L. (152) 1
Aran, J.-M., see Popelár, J. (152) 128
Arenberg, J.G., see Miller, A.L. (152) 55
Athas, G., see Holt, J.C. (152) 25

Baisch, A., see Preyer, S. (152) 139
Banks, J.R., see Todd, N.P.M. (152) 175
Bar-Yosef, O., see Rotman, Y. (152) 110
Bless, D., see Preyer, S. (152) 139
Botterman, N., see Boulassel, M.-R. (152) 10
Boulassel, M.-R., Guérit, J.M., Denison, S., de Tourtchaninoff, M., Wenderickx, L., Botterman, N., Deggouj, N., Gersdorff, M. and Tomasi, J.P.
No evidence of auditory dysfunction in guinea pigs immunized with myelin P0 protein (152) 10

Charlet de Sauvage, R., see Wuyts, F.L. (152) 1
Cody, F.W.J., see Todd, N.P.M. (152) 175
Colebatch, J.G. and Halmagyi, G.M.
Polarity of click and tone-evoked vestibulocollic reflexes (152) 173

D'Haese, P., see Wuyts, F.L. (152) 1
de Boer, E., see Nuttall, A.L. (152) 77
de Tourtchaninoff, M., see Boulassel, M.-R. (152) 10
Deggouj, N., see Boulassel, M.-R. (152) 10
Denison, S., see Boulassel, M.-R. (152) 10
Dent, M.L., see Dooling, R.J. (152) 159
Dooling, R.J., Dent, M.L., Leek, M.R. and Gleich, O.
Masking by harmonic complexes in birds: behavioral thresholds and cochlear responses (152) 159

Erre, J.-P., see Wuyts, F.L. (152) 1
Erre, J.-P., see Popelár, J. (152) 128

Garcia, M.M., see Holt, J.C. (152) 25
Gersdorff, M., see Boulassel, M.-R. (152) 10
Gleich, O., see Dooling, R.J. (152) 159
Goode, R.L., see Aibara, R. (152) 100
Guérit, J.M., see Boulassel, M.-R. (152) 10
Gummer, A.W., see Preyer, S. (152) 139
Guth, P., see Perin, P. (152) 67
Guth, P.S., see Holt, J.C. (152) 25

Halmagyi, G.M., see Colebatch, J.G. (152) 173
Hant, J., see Lin, X. (152) 90
Harada, T., Ogawa, K., Inoue, Y. and Kanzaki, J.
Effects of changes in stimulus level on phases of distortion product otoacoustic emissions (152) 152
Holt, J.C., Lioudyno, M., Athas, G., Garcia, M.M., Perin, P. and Guth, P.S.
The effect of proteolytic enzymes on the α9-nicotinic receptor-mediated response in isolated frog vestibular hair cells (152) 25

Inoue, Y., see Harada, T. (152) 152

Kanzaki, J., see Harada, T. (152) 152

Leek, M.R., see Dooling, R.J. (152) 159
Lin, X. and Hant, J.
Computer-simulation studies on roles of potassium currents in neurotransmission of the auditory nerve (152) 90
Lioudyno, M., see Holt, J.C. (152) 25

Martini, M., see Perin, P. (152) 67
Masetto, S., see Perin, P. (152) 67
Middlebrooks, J.C., see Miller, A.L. (152) 55
Miller, A.L., Arenberg, J.G., Middlebrooks, J.C. and Pfingst, B.E.
Cochlear implant thresholds: comparison of middle latency responses with psychophysical and cortical-spike-activity thresholds (152) 55

Nelken, I., see Rotman, Y. (152) 110
Nodar, R.H., see Sahley, T.L. (152) 43
Nuttall, A.L., Zheng, J., Ren, T. and de Boer, E.
Electrically evoked otoacoustic emissions from apical and basal perilymphatic electrode positions in the guinea pig cochlea (152) 77

Ogawa, K., see Harada, T. (152) 152

Perin, P., Masetto, S., Martini, M., Rossi, M.L., Rubbini, G., Rispoli, G., Guth, P., Zucca, G. and Valli, P.
Regional distribution of calcium currents in frog semicircular canal hair cells (152) 67
Perin, P., see Holt, J.C. (152) 25
Pfingst, B.E., see Miller, A.L. (152) 55
Popelár, J., Erre, J.-P., Syka, J. and Aran, J.-M.
Effects of contralateral acoustical stimulation on three measures of cochlear function in the guinea pig (152) 128
Preyer, S., Baisch, A., Bless, D. and Gummer, A.W.
Distortion product otoacoustic emissions in human hypercholesterolemia (152) 139
Puria, S., see Aibara, R. (152) 100

Ren, T., see Nuttall, A.L. (152) 77
Rispoli, G., see Perin, P. (152) 67
Rossi, M.L., see Perin, P. (152) 67
Rotman, Y., Bar-Yosef, O. and Nelken, I.
Relating cluster and population responses to natural sounds and tonal stimuli in cat primary auditory cortex (152) 110
Rubbini, G., see Perin, P. (152) 67

Sahley, T.L. and Nodar, R.H.
A biochemical model of peripheral tinnitus (152) 43
Scholik, A.R. and Yan, H.Y.
Effects of underwater noise on auditory sensitivity of a cyprinid fish (152) 17
Syka, J., see Popelár, J. (152) 128

PII: S0378-5955(01)00233-7

Todd, N.P.M., Cody, F.W.J. and Banks, J.R.
Reply to "Polarity of click and tone-evoked vestibulocollic reflexes" by J.G. Colebatch and G.M. Halmagyi (152) 175
Tomasi, J.P., see Boulassel, M.-R. (152) 10

Valli, P., see Perin, P. (152) 67
Van de Heyning, P.H., see Wuyts, F.L. (152) 1
Van der Stappen, A., see Wuyts, F.L. (152) 1
Van Spaendonck, M., see Wuyts, F.L. (152) 1

Welsh, J.T., see Aibara, R. (152) 100
Wenderickx, L., see Boulassel, M.-R. (152) 10
Wuyts, F.L., Van de Heyning, P.H., Van Spaendonck, M., Van der Stappen, A., D'Haese, P., Erre, J.-P., Charlet de Sauvage, R. and Aran, J.-M.
Rate influences on tone burst summating potential amplitude in electrocochleography: clinical and experimental data (152) 1

Yan, H.Y., see Scholik, A.R. (152) 17

Zheng, J., see Nuttall, A.L. (152) 77

HEARING RESEARCH

www.elsevier.com/locate/heares

Subject Index Volume 152

Accumulative inactivation
Spiral ganglion neuron; Auditory coding; Action potential width; Synaptic modeling; Voltage-gated potassium current (Lin, X. (152) 90)

Acetylcholine
α9-Nicotinic receptor; Papain; Protease; Hair cells; Patch clamp (Holt, J.C. (152) 25)

Action potential width
Spiral ganglion neuron; Auditory coding; Synaptic modeling; Voltage-gated potassium current; Accumulative inactivation (Lin, X. (152) 90)

Audition
Myelin P0; Inner ear; Immune; Guinea pig (Boulassel, M.-R. (152) 10)

Auditory brainstem response
Noise induced hearing loss; Temporary threshold shift; Fathead minnow (Scholik, A.R. (152) 17)

Auditory coding
Spiral ganglion neuron; Action potential width; Synaptic modeling; Voltage-gated potassium current; Accumulative inactivation (Lin, X. (152) 90)

Auditory cortex
Cochlear implant; Electrically evoked middle latency response; Psychophysics; Threshold; Phase duration; Electrode configuration (Miller, A.L. (152) 55)

Auditory nerve
Transient otoacoustic emissions; Compound action potential; Ensemble Background activity; Contralateral suppression; Guinea pig (Popelár, J. (152) 128)

Basilar membrane vibration
Distortion product; Otoacoustic emission; Phase; Cochlear mechanics (Harada, T. (152) 152)

Bird
Masking; Harmonic complex; Cochlear microphonics (Dooling, R.J. (152) 159)

Ca current
Frog; Vestibular; Hair cell; Semicircular canal; Patch-clamp; Nimodipine (Perin, P. (152) 67)

Cat
Primary auditory cortex; Natural sound; Population coding; Rate profile; Volterra kernel (Rotman, Y. (152) 110)

Cochlear implant
Auditory cortex; Electrically evoked middle latency response; Psychophysics; Threshold; Phase duration; Electrode configuration (Miller, A.L. (152) 55)

Cochlear input impedance
Middle-ear sound transmission; Middle-ear sound pressure gain; Scala vestibuli sound pressure; Stapes footplate velocity (Aibara, R. (152) 100)

Cochlear mechanics
Distortion product; Otoacoustic emission; Phase; Basilar membrane vibration (Harada, T. (152) 152)

Cochlear microphonics
Masking; Bird; Harmonic complex (Dooling, R.J. (152) 159)

Compound action potential
Transient otoacoustic emissions; Auditory nerve; Ensemble Background activity; Contralateral suppression; Guinea pig (Popelár, J. (152) 128)

Contralateral suppression
Transient otoacoustic emissions; Auditory nerve; Compound action potential; Ensemble Background activity; Guinea pig (Popelár, J. (152) 128)

Distortion product
Otoacoustic emission; Phase; Cochlear mechanics; Basilar membrane vibration (Harada, T. (152) 152)

Distortion product otoacoustic emission
Growth function of DPOAE; Hearing threshold; Speech audiometry; Familial hypercholesterolemia (Preyer, S. (152) 139)

Dynorphin
Lateral efferent olivocochlear system; *N*-Methyl-D-aspartate receptors; Glutamate; Stress; Tinnitus (Sahley, T.L. (152) 43)

Electrically evoked middle latency response
Cochlear implant; Auditory cortex; Psychophysics; Threshold; Phase duration; Electrode configuration (Miller, A.L. (152) 55)

Electrocochleography
Tone bursts stimulation; Repetition rate; Hydrops; Ménière disease; Human; Guinea pig (Wuyts, F.L. (152) 1)

Electrode configuration
Cochlear implant; Auditory cortex; Electrically evoked middle latency response; Psychophysics; Threshold; Phase duration (Miller, A.L. (152) 55)

PII: S0378-5955(01)00234-9

Electromotility
Guinea pig; Fine structure; Traveling wave; Outer hair cell; Otoacoustic emission (Nuttall, A.L. (152) 77)

Ensemble Background activity
Transient otoacoustic emissions; Auditory nerve; Compound action potential; Contralateral suppression; Guinea pig (Popelár, J. (152) 128)

Familial hypercholesterolemia
Distortion product otoacoustic emission; Growth function of DPOAE; Hearing threshold; Speech audiometry (Preyer, S. (152) 139)

Fathead minnow
Auditory brainstem response; Noise induced hearing loss; Temporary threshold shift (Scholik, A.R. (152) 17)

Fine structure
Guinea pig; Traveling wave; Outer hair cell; Electromotility; Otoacoustic emission (Nuttall, A.L. (152) 77)

Frog
Vestibular; Hair cell; Semicircular canal; Ca current; Patch-clamp; Nimodipine (Perin, P. (152) 67)

Glutamate
Dynorphin; Lateral efferent olivocochlear system; *N*-Methyl-D-aspartate receptors; Stress; Tinnitus (Sahley, T.L. (152) 43)

Growth function of DPOAE
Distortion product otoacoustic emission; Hearing threshold; Speech audiometry; Familial hypercholesterolemia (Preyer, S. (152) 139)

Guinea pig
Electrocochleography; Tone bursts stimulation; Repetition rate; Hydrops; Ménière disease; Human (Wuyts, F.L. (152) 1)

Myelin P0; Inner ear; Immune; Audition (Boulassel, M.-R. (152) 10)

Transient otoacoustic emissions; Auditory nerve; Compound action potential; Ensemble Background activity; Contralateral suppression (Popelár, J. (152) 128)

Fine structure; Traveling wave; Outer hair cell; Electromotility; Otoacoustic emission (Nuttall, A.L. (152) 77)

Hair cell
Frog; Vestibular; Semicircular canal; Ca current; Patch-clamp; Nimodipine (Perin, P. (152) 67)

Hair cells
Acetylcholine; α9-Nicotinic receptor; Papain; Protease; Patch clamp (Holt, J.C. (152) 25)

Harmonic complex
Masking; Bird; Cochlear microphonics (Dooling, R.J. (152) 159)

Hearing threshold
Distortion product otoacoustic emission; Growth function of DPOAE; Speech audiometry; Familial hypercholesterolemia (Preyer, S. (152) 139)

Human
Electrocochleography; Tone bursts stimulation; Repetition rate; Hydrops; Ménière disease; Guinea pig (Wuyts, F.L. (152) 1)

Hydrops
Electrocochleography; Tone bursts stimulation; Repetition rate; Ménière disease; Human; Guinea pig (Wuyts, F.L. (152) 1)

Immune
Myelin P0; Inner ear; Audition; Guinea pig (Boulassel, M.-R. (152) 10)

Inner ear
Myelin P0; Immune; Audition; Guinea pig (Boulassel, M.-R. (152) 10)

Lateral efferent olivocochlear system
Dynorphin; *N*-Methyl-D-aspartate receptors; Glutamate; Stress; Tinnitus (Sahley, T.L. (152) 43)

Masking
Bird; Harmonic complex; Cochlear microphonics (Dooling, R.J. (152) 159)

Ménière disease
Electrocochleography; Tone bursts stimulation; Repetition rate; Hydrops; Human; Guinea pig (Wuyts, F.L. (152) 1)

***N*-Methyl-D-aspartate receptors**
Dynorphin; Lateral efferent olivocochlear system; Glutamate; Stress; Tinnitus (Sahley, T.L. (152) 43)

Middle-ear sound pressure gain
Middle-ear sound transmission; Cochlear input impedance; Scala vestibuli sound pressure; Stapes footplate velocity (Aibara, R. (152) 100)

Middle-ear sound transmission
Middle-ear sound pressure gain; Cochlear input impedance; Scala vestibuli sound pressure; Stapes footplate velocity (Aibara, R. (152) 100)

Myelin P0
Inner ear; Immune; Audition; Guinea pig (Boulassel, M.-R. (152) 10)

Natural sound
Cat; Primary auditory cortex; Population coding; Rate profile; Volterra kernel (Rotman, Y. (152) 110)

α9-Nicotinic receptor
Acetylcholine; Papain; Protease; Hair cells; Patch clamp (Holt, J.C. (152) 25)

Nimodipine
Frog; Vestibular; Hair cell; Semicircular canal; Ca current; Patch-clamp (Perin, P. (152) 67)

Noise induced hearing loss
Auditory brainstem response; Temporary threshold shift; Fathead minnow (Scholik, A.R. (152) 17)

Otoacoustic emission
Distortion product; Phase; Cochlear mechanics; Basilar membrane vibration (Harada, T. (152) 152)

Guinea pig; Fine structure; Traveling wave; Outer hair cell; Electromotility (Nuttall, A.L. (152) 77)

Outer hair cell
Guinea pig; Fine structure; Traveling wave; Electromotility; Otoacoustic emission (Nuttall, A.L. (152) 77)

Papain
Acetylcholine; α9-Nicotinic receptor; Protease; Hair cells; Patch clamp (Holt, J.C. (152) 25)

Patch clamp
Acetylcholine; α9-Nicotinic receptor; Papain; Protease; Hair cells (Holt, J.C. (152) 25)

Patch-clamp
Frog; Vestibular; Hair cell; Semicircular canal; Ca current; Nimodipine (Perin, P. (152) 67)

Phase
Distortion product; Otoacoustic emission; Cochlear mechanics; Basilar membrane vibration (Harada, T. (152) 152)

Phase duration
Cochlear implant; Auditory cortex; Electrically evoked middle latency response; Psychophysics; Threshold; Electrode configuration (Miller, A.L. (152) 55)

Population coding
Cat; Primary auditory cortex; Natural sound; Rate profile; Volterra kernel (Rotman, Y. (152) 110)

Primary auditory cortex
Cat; Natural sound; Population coding; Rate profile; Volterra kernel (Rotman, Y. (152) 110)

Protease
Acetylcholine; α9-Nicotinic receptor; Papain; Hair cells; Patch clamp (Holt, J.C. (152) 25)

Psychophysics
Cochlear implant; Auditory cortex; Electrically evoked middle latency response; Threshold; Phase duration; Electrode configuration (Miller, A.L. (152) 55)

Rate profile
Cat; Primary auditory cortex; Natural sound; Population coding; Volterra kernel (Rotman, Y. (152) 110)

Repetition rate
Electrocochleography; Tone bursts stimulation; Hydrops; Ménière disease; Human; Guinea pig (Wuyts, F.L. (152) 1)

Scala vestibuli sound pressure
Middle-ear sound transmission; Middle-ear sound pressure gain; Cochlear input impedance; Stapes footplate velocity (Aibara, R. (152) 100)

Semicircular canal
Frog; Vestibular; Hair cell; Ca current; Patch-clamp; Nimodipine (Perin, P. (152) 67)

Speech audiometry
Distortion product otoacoustic emission; Growth function of DPOAE; Hearing threshold; Familial hypercholesterolemia (Preyer, S. (152) 139)

Spiral ganglion neuron
Auditory coding; Action potential width; Synaptic modeling; Voltage-gated potassium current; Accumulative inactivation (Lin, X. (152) 90)

Stapes footplate velocity
Middle-ear sound transmission; Middle-ear sound pressure gain; Cochlear input impedance; Scala vestibuli sound pressure (Aibara, R. (152) 100)

Stress
Dynorphin; Lateral efferent olivocochlear system; *N*-Methyl-D-aspartate receptors; Glutamate; Tinnitus (Sahley, T.L. (152) 43)

Synaptic modeling
Spiral ganglion neuron; Auditory coding; Action potential width; Voltage-gated potassium current; Accumulative inactivation (Lin, X. (152) 90)

Temporary threshold shift
Auditory brainstem response; Noise induced hearing loss; Fathead minnow (Scholik, A.R. (152) 17)

Threshold
Cochlear implant; Auditory cortex; Electrically evoked middle latency response; Psychophysics; Phase duration; Electrode configuration (Miller, A.L. (152) 55)

Tinnitus
Dynorphin; Lateral efferent olivocochlear system; *N*-Methyl-D-aspartate receptors; Glutamate; Stress (Sahley, T.L. (152) 43)

Tone bursts stimulation
Electrocochleography; Repetition rate; Hydrops; Ménière disease; Human; Guinea pig (Wuyts, F.L. (152) 1)

Transient otoacoustic emissions
Auditory nerve; Compound action potential; Ensemble Background activity; Contralateral suppression; Guinea pig (Popelár, J. (152) 128)

Traveling wave
Guinea pig; Fine structure; Outer hair cell; Electromotility; Otoacoustic emission (Nuttall, A.L. (152) 77)

Vestibular
Frog; Hair cell; Semicircular canal; Ca current; Patch-clamp; Nimodipine (Perin, P. (152) 67)

Voltage-gated potassium current
Spiral ganglion neuron; Auditory coding; Action potential width; Synaptic modeling; Accumulative inactivation (Lin, X. (152) 90)

Volterra kernel
Cat; Primary auditory cortex; Natural sound; Population coding; Rate profile (Rotman, Y. (152) 110)
